## LIFE IMPRISONMENT

Curt Jett and Tom White Convicted of Murder.

The Application For a New Trial Was Made-The Prosecution May Not Oppose the Motion as to Jett'a Case.

Cynthiana, Ky., Aug. 15 .- Curt Jeil and Tom White, the Jackson femilials, were both found guilty of the Marcum assassination by the jury Friday and sentenced to life terms in the peniten-

White finshed as the jurors handed the verdict to the judge and tears came into his eyes and the blood seemed to leave his face as he heard the fateful words. Jett, with elinched jaws, listened to the sentence and still irird to keep up his air of bragga-

The defense flied grounds and mo Hon for a new trial at it o'clock Friday morning and Judge O'borne set 8 30 o'clock Saturday morning for the hearing of the motion. The motion and grounds consist entirely of objecflons to the evidence ruled in by the court, and the attempted introduction of evidence by the defenne, and which was ruled out, and also to ce tain affidavits made by the defendants and lug that a fair and Impartial trisl could but he had here on account of military display being made which infinined the not be had. It is simost in that the judge will overmie th this new trial.

The attorneys for the were in consultation all, 1 >1) noon as to whether or hot they will oppose the wotlon as to Jett, as they asy if they can get a new trial in this ease they will have enough evidence in the case at the next trial to convict However, Prosecuting Attorney Hyrd said that if they concluded to oppose the new trial, that at the next term of the listrison circuit court before Judge Osborne, which begins three weeks from Monday, they will but forward the case of the common wealth against Curtiss Jett, one of the defendants, for the murder of Jim Cockerili, to which murder there were some six eye witnesses, thereby sue ceeding in hanging Jett, which has been the ultimate aim of the prosecu tion in the case just tried

The main features in the case at bar Felday have be n the charges against Juror Jasper King, who lives In this city, and who was until two years ago a deputy sheriff of the counteemed Juriers McNees, Northeutt and Tate all sahl Friday morning that King did attempt to influence them to deelde for Jett and White in this case by saving that there was nothing against the defendants. Judge Os borne, in his admonition to the jury told them not to talk about this case among each other until it was thally given to them to decide. This seems and it is said by attorneys here, to be centempt of court.

No movements have been made as yet as to the aoidlers and Col. Wil linms, the officer in command of the situation, said Friday siternoon the no movementa as to the soldiers were yet decided on and would not be deelded on gotil Saturday after the grounds and motion for a new trial had been passed on by the court and that the matter of the movements of the soldlers were in the hands of him self and Judge Oaborne.

THE CANAL TREATY, The Colombian Senate Unanimously

Rejected IL Washington, Aug. 18.-A cablegram

dated August 12 has been received at the state department from Minister Heaupre, at Hogots, saying that the Pannma canal treaty has been rejected by the Colombian senate. President Hoosevelt was immediately advised of the news, Mr. Reampre's telegram be ing forwarded by Acting Secretary. Lonnis to Oyater Hny.

The renson given for the rejection of the treaty by the Colombian aenate, it is said here, was the alleged encreachment on Colombian sovereignty which its opponents contended would result from the treaty. This Information was contained in a dispatch received Monday night by Dr. Herren, the Colombian charge, from Foreign Minister Itleos, at Itogota. This dispatch showed that In Its present form the treaty was absolutely unacceptable to the senate for the reason abuve stated and that it had been rejected unanimously. The view taken by the senajo was at variance to that held by the government of Colombia, which feit satisfied when it submitted the treaty to congress that there would be no impuirment of Colombian sovereignty if the treaty should be

Inchientally to the general question of sovereignty necessary was that of lease of the strip of land through which the canal was to be constructed and the debate in the Colombian senate indicated that that hody regarded this as amounting to a sale of the land, therefore objectionable. When the treaty was submitted to the senate by the committee to which it was referreil, seven of the senatora favored it with certain amendments which they proposed and the remaining two opposed it absolutely. The amendments proposed by the majority are not stated here, but they evidently referred to the question of sovereignty, as is indicated by the subsequent rejection of the treaty lo lta present form

Colon, Colombia, Aug 18 .- The re jection of the count treaty by the Coombian senate has produced tremen dons excitement on the lathmus. It was generally believed that the treaty would pass with some modifications There is good reason to suppose that the majority of the members of the senate regard the Spooner amendment to build a canal by the Nicaraguan route, if the l'anamit route was reject ed by Colombin, as a mere threat on are convinced that the Nicaragian project is Impossible and that the United States will again deal with Co-

The rejection is a heavy blow to property owners here who have been investing beavily on the prospects of the treaty's being ratified.

While our Industries are expanding with amazing rapidity we are using up our forests, our oll wells, our natural gas and our coal beds as recklessly as If we thought they would last forever. Prof. Gorby declares that the waste of patural gus in indiana alone is equal In value to \$10,000 per day. Within a single century we have annihilated 97 per cent, of our magnificent forest trees. a waste without parallel in history, and one for which posterity will surely re-

Our waste of food is appalling. Cooking is a lost art in the average household. At least \$1,000,000 is every year thrown away in defective cooking; so Prof. Matthewa estimates. There is no comfort in the fact that the English people are just as prodigal, though they have a much leaner pantry to draw upon, 't'rof, Marshall, an eminent English economist, says the British working classes spend \$500,000,000 every year for things that give them neither comfort nor happiness, and the president of the Hritish association recently expressed his belief that this vast sum vas wasted in food alone.

On our farma twice as much food products at least are grown as are consumpl. An agricultural expert recently estimated that one-half of all the fruit grown in American prehards rols un calen. The, further loss from Insects ignorant cultivation, earcless handling

and poor storage is Incalculable. Probably the greatest waste of all 19 hat which seems to be involuntary on the part of our working people. They buy their bread at retail and pay three imes as much for it as If they bought It in flour by the barrel. It is the lestlmony of retail lutchers that the poor luly meats also with far less frugality than the rich. Edward Atkinson has been for 20 years showing by practical experiments that the largest amount of nourishment can be obtained from lingly have made sacrifiers for the the cheapest culs of meat, if they are so cooked as to anve instead of throw away the food there is in them. But as the independent says, buying at wholesale is unknown to the majority of American families, and we support a vast number of middlemeu whose profits might be easily saved.

Our contemporary's conclusion that studies in domestic eronomy might be carried into our schools with great advantage is sensible. Five times our present population at least could and should be well fed-without any increase of our cultivated area. We cannot continue our present extravagances forever. MEN WHO ARE TALKED ABOUT.

Senator Hoar, of Massachusells, ultered the following admonition at the Worcester summer school: "Conatllutions and states, congresses and laws, police and elections, nil break down and come to grief unless behind them and underneath them there be human character. You may have all these things, but there will come a time when you must depend upon some Individual to do right."

At a recent meeting of itenjamin Hamrick's family in Webster Springs, W. Va., it developed that the aggregate atature of Mr. Hamrick and his eight aons was sixty-two and one-half leet. The father stands six feet five and one-half inches, and the "sawed off" of the family, a son named William, is six frel one luch. His record for thelturnity is almost without parallel, it being nothing unusual for him to gr through an entire day without saving more than half a dozen words. It is sald that when a close friend spoke to him of this peculiarity Mr. Haggin made this reply, a fremendously long speech for him: "Joyner, my trainer, does enough hollering for both of us."

WASTEFULNESS OF AMERICANS Prodigality in Use of Food and Clothe ing Samething Appalling-Los Farm Products.

Premising that the American people are the slowest in the world to be aroused un the subject of ceonomy, the Independent calls atlention once more to the great items of waste in mir national life, says the New York World.

While our industries are expanding with amazing rapidity we are using up our foresis, our oil wells, our natural gas aml our coal beds as recklessly as If we thought they would last forever. Prof. Gorby declares that the waste of Patural gus in Indiana alone is equal In value to \$10,000 per day. Within a single century we have annihilated 97 per cent, of our magnificent forest trees, a waste without parallel in history, and one for which posterity will surely re-

proach as. Our waste of food is appalling. Cook-Ing is a lost art in the average household. At least \$1,000,000 Is every year thrown away in defertive cooking; so Prof. Matthews estimates. There is no comfort in the fact that the English people are just as prodigal, though they have a much leaner pantry to draw upou. Prof. Marshall, an eminent English economist, says the British working classes spend \$500,000,000 every year for things that give them neither comfort nor happiness, and the president of the Itritlah association recently expressed his belief that this vast sum was wasted in food alone.

On our farms twice as much food products at least are grown as are consumed. An agricultural expert recently estimated that one-half of all the fruit grown in American orchards rois uncalen. The further loss from inseels, ignorant cultivation, careless handling and woor storage is incalculable.

Probably the greatest waste of all Is that which seems to be involuntary on the part of our working people. Thry buy their bread at retail and pay three imes as much for it as if they bought it in flour by the barrel. It is the tes-Ilmany of retail butchers that the poor buy meats also with far less frugality than the rich. Edward Atkinson has been for 20 years showing by practical experiments llat the largest amount of nourishment ean be obtained from the cheapest cuts of meat, if they are so cooked as to save instead of throw away the food there is in them. But as the Independent says, having at wholesale is unknown to the majority of American familles, and we support a vast number of middlemen whose profits might be easily saved.

ttur contemporary's conclusion that studies in domestie economy might be carried into our schools with great advantage is sensible. Five times our present population at least could and should be well fed-without any increase of our cultivated area. We cannot continue our present extravagances forever. "Waste nnt, was "A." Is a sound maxim for nations as well as individu-
